# Business Analysis

**Business Analysis Training School** is a professional training company offering courses which produce professionals who are ready to take up real-time industry challenges in advanced modern technologies such as Business Analysis, Microsoft Dynamics AX, Microsoft SQL Server, Microsoft BI tools etc.

**Business Analysis Training School** is equipped with industry experts with over 12+ years of experience, Microsoft Certified Trainers, and real-time working professionals to train on all the technologies that are on offer. We have a state-of-the-art online infrastructure with online library and Genuine Microsoft Software to provide hands-on-labs training for most of the courses.

## Business Analyst

A Business Analyst is a new-economy job in software industry, who acts as a liaison between business people and technology people ensuring smooth functioning of entire software development life cycle.

Business Analysts are responsible for identifying business needs, requirements development and requirements management. Specifically, the Business Analyst elicits, analyzes, validates and documents business requirements.

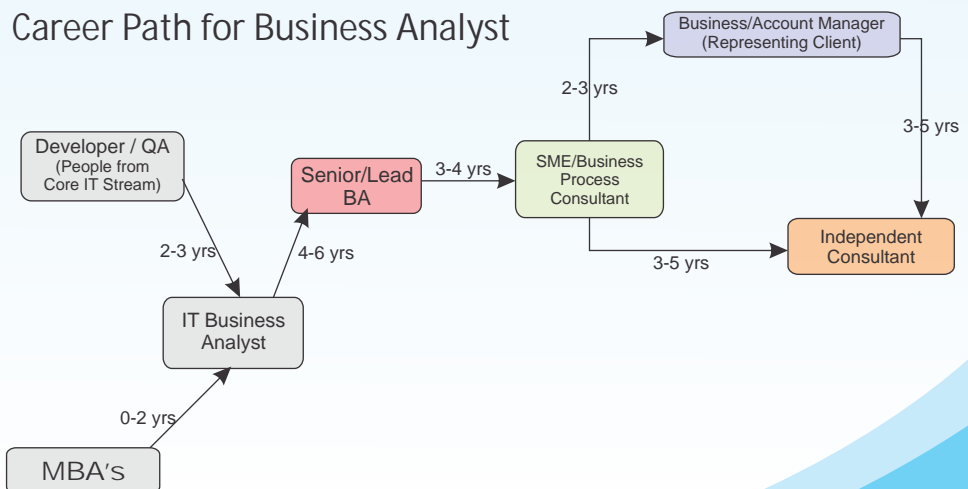

The Business Analyst is a key facilitator within an organization, acting as a bridge between the client, stakeholders and the solutions team.

Business Analysis is the set of tasks and techniques used to work as a liaison among stakeholders in requirements management for a software project. Business Analysis ensures that the customer, end user, and developers have a common understanding of software project requirements.

## Business Analysis Course

This online course equipped with 20-25 hours or online sessions + 25 hours of assignments + 15 hours of real-time sample project. Total duration of the course is for 60+ hours. Topic-wise practical applicative approach to the subject with case studies is provided.

### Career Path for Business Analyst
